VP-144/288MX2 Series

144/288-Megapixel Thermoelectric Peltier Cooled Camera
with CoaXPress 2.0 Interface

CoaXPress®

The VP-144/288MX2, the latest models of the industrial proven VP series, are new 144/288-Megapixel CoaXPress 2.0 cameras and adopt the cutting-edge High Speed CMOS Image Sensor. The VP-288MX2 camera offers up to 15 frames per second at 24,000 × 12,000 resolution. The cameras in this series use thermoelectric Peltier (TEC) cooling technology developed for and used by many demanding medical market customers.

The TEC maintains the operating temperature of the image sensor at up to 10 degrees below ambient temperature. The camera provides a stable operating condition and the ability to expose for a long period of time to increase camera sensitivity. Featuring the stable operating capability and high resolution, this camera is ideal for demanding applications such as FPD, PCB and semiconductor inspections.
