

iPORT™ CL-Ten External Frame Grabbers

High-performance GigE Vision connectivity for Camera Link Full and Medium cameras over 10 GigE links

Overview

Pleora's iPORT™ CL-Ten External Frame Grabbers use a high-performance GigE Vision® 2.0 over 10 Gigabit Ethernet (10 GigE) link to transmit video simultaneously from two Camera Link Base or Medium cameras, or a single Camera Link Full camera at maximum data rates, with low, predictable latency. These external frame grabbers allow designers to extend and aggregate system cabling, and integrate Camera Link cameras into a networked environment.

CL-Ten External Frame Grabbers interact seamlessly with Pleora's other products in networked or point-to-point digital video systems. The frame grabbers also comply fully with the GigE Vision and GenICam™ standards, enabling interoperation with third-party equipment in multi-vendor environments. The GigE Vision and GenICam standards are agnostic to Ethernet link speed, which means the CL-Ten can be designed into multi-speed systems alongside GigE Vision cameras operating at 1 Gb/s, with no software modifications. Deploying the CL-Ten, manufacturers and integrators can shorten time-to-market, reduce development and deployment risk, and lower design and system costs.

The CL-Ten converts video data to packets and sends them over a 10 GigE link to receiving software or hardware. The CL-Ten is compatible with industry-standard fiber-based links via an SFP+ (small form-factor pluggable) connector, and can be easily connected to off-the-shelf 10 GigE components such as network cards and switches.

A sophisticated on-board programmable logic controller (PLC) allows users to precisely measure, synchronize, trigger, and control the operation of other vision system elements.

Features

- Transmits video from Camera Link cameras over 10 GigE with low, consistent latency
- Product options for designers to meet system requirements:
 - iPORT CL-Ten Full supports transmission of a single Full (including Deca/80-bit), Medium, or Base mode camera
 - iPORT CL-Ten Dual Medium supports simultaneous transmission of 1 or 2 Medium or Base mode cameras
- Provides power to cameras utilizing the Power over Camera Link (PoCL) standard
- RS-232 and GPIO to control external accessories
- GenICam Integration Package (consisting of the iPORT AutoGen XML generation tool and a firmware reference design) makes it fast and easy to create a user-friendly GenICam interface (contact sales for pricing information on this integration package)

Ordering Information

905-0001	• iPORT CL-Ten Dual Medium External Frame Grabber in mountable enclosure.
905-0003	• iPORT CL-Ten Dual Medium Fiber Development Kit includes 905-0001, power supply, 10 GigE NIC, two SFP+ fiber modules, 2m of fiber optic cabling, and an eBUS SDK USB stick.
905-0008	• iPORT CL-Ten Full External Frame Grabber in mountable enclosure.
905-0009	• iPORT CL-Ten Full Fiber Development Kit includes 905-0008, power supply, 10 GigE NIC, two SFP+ fiber modules, 2m of fiber optic cabling, and an eBUS SDK USB stick.

iPORT CL-Ten External Frame Grabbers

Networked Video Connectivity Solutions

iPORT™ External Frame Grabbers	<ul style="list-style-type: none"> Highly reliable, up to 8.16 Gb/s data transfer rate with low, end-to-end latency Enclosed unit
eBUS SDK	<ul style="list-style-type: none"> eBUS SDK: Single API to receive video over GigE, 10 GigE, and USB that is portable across Windows, Mac, and Linux eBUS Tx: Software implementation of a full device level GigE Vision transmitter eBUS Rx: High-speed reception of images or data for hand-off to the end application eBUS Player Toolkit: View streams and develop, test and evaluate advanced features
GigE Vision® 2.0	<ul style="list-style-type: none"> Fully-compatible firmware load Guarantees delivery of all packets Comprehensive data transfer diagnostics

Camera Compatibility

Camera Link® cameras	<ul style="list-style-type: none"> iPORT CL-Ten Dual Medium compatible with Base and Medium mode cameras at up to 85 MHz iPORT CL-Ten Full compatible with Full (including Deca/80-bit) mode cameras at up to 85MHz Supports Power over Camera Link (PoCL) Supports CLProtocol
Tap Geometry	<ul style="list-style-type: none"> 1X_1Y, 1X2_1Y, 1X, 1X2, 1X4_1Y, 1X4, 2X2E, 1X8_1Y, 1X8, 1X10_1Y, 1X10

Connectors

Power	<ul style="list-style-type: none"> 6-pin circular, male
Network	<ul style="list-style-type: none"> Supports 10GBASE-SR, -LR, and -LRM using linear or limiting SFP+ modules
