

# HDMI Splitter Board

CIB-HDMI-01

- HDMI Video Pass-through
- No Latency
- Direct Connection to Z3 Technology's FV4K and Q603 Video Encoders
- Small Form Factor

The CIB-HDMI-01 is designed to enable HDMI splitting for Sony 4K and HDMI cameras. The CIB-HDMI-01 takes the raw camera feed through the Camera KEL connector and uses the Second KEL connector to feed the encoder to provide a compressed output. The HDMI 1.4a is a no latency pass-through directly from the Camera.

## Technical

Cameras Supported	Sony 4K & HDMI Cameras including the ER8530 and EW9500H
Video Output	•HDMI
Interfaces	•HDMI 1.4a and Micro-USB Input
Features	•Splitter board bolts directly to the FV4K and Q603 Camera Interface Board •No Latency Pass-through from 4K Sony Cameras.

## Specifications

Encoder Board Size	60 x 13 x 25 mm
Encoder Board Weight	10g
Temperature Range	-40° C to 80° C
