HIGH BRIGHTNESS TOUCH SCREENS

The VL-SRMTP-10.1A are small open frame touch screens. They feature at least 1200 nits brightness and a 16:10 aspect ratio. We design the VL-SRMTP-10.1A monitors for use in direct sunlight. Consequently, they are also perfect for other high ambient-light conditions. They utilize state-of-the-art LED backlights. The models in this series produce at least 1,200 nits brightness. In contrast, this is over 3 to 5 times brighter than standard monitors. For example, standard monitors are only 200-300 nits brightness. Therefore, the result is an amazingly bright screen. This will provide you with crystal-clear images, even with bright, direct sunlight on the face of the screen.

INDUSTRIAL TOUCHSCREEN DISPLAYS

The VL-SRMTP-10.1A 10.1" small HDMI touch screens are extremely rugged. For instance, we build them with true industrial-grade components. Furthermore, they receive our exclusive TRU-Tuff treatment. The TRU-Tuff process includes RTV silicone on all connections and critical components. Additionally, all wires are dressed, tie-wrapped and secured. Lastly, we apply ThreadLock to all screws. The steel enclosure will ensure maximum shock and vibration resistance for this rugged 1500 nits brightness monitor.

HIGH BRIGHTNESS TOUCH SCREENS WITH HIGH OPERATING TEMPERATURES

We design the VL-SRMTP-10.1A Sunlight Readable touch screen monitors to operate in nearly any environmental conditions. Whether in frigid conditions or blazing heat, these sunlight displays will survive and thrive. To clarify, these monitors will operate in temperatures down to -4°F (-20°C). They will also withstand brutal heat, with operating temperatures up to 149°F (65°C).
